## Metastorm Recognized in *Intelligent Enterprise* Editors' Choice Awards

### *Metastorm Named a 'Company to Watch' in Process Management Category*

**BALTIMORE, MD – January 9, 2008** – Metastorm, a leading provider of Business Process Management (BPM), Business Process Analysis (BPA), and Enterprise Architecture (EA) software for aligning strategy with execution, today announced it has been recognized a “company to watch” in the Process Management category of CMP's *Intelligent Enterprise* 2008 Editors' Choice Awards. The editors chose 48 companies that provide exceptional vision, technology innovation and customer leadership in attaining strategic objectives.

According to *Intelligent Enterprise* editors, Metastorm is cited as being one of Microsoft's closest BPM (business process management) partners, and a company that has demonstrated — through multiple acquisitions, strong partnerships and organic development — that it is intent on leading with a complete technology suite and a global footprint.

"We are very pleased to receive the *Intelligent Enterprise* Editors' Choice award for Process Management. This serves as yet another proof point of Metastorm's leadership in the BPM market which we have a long history in," stated Eileen Garry, CMO of Metastorm. "To date, more than 1100 companies in 109 countries are using Metastorm for business process management, enterprise architecture and business process analysis, and we are very proud to have helped so many companies drive value and deliver results."

## **About Metastorm, Inc.**

With a focus on enterprise visibility, optimization, and agility, Metastorm offers market-leading solutions for Enterprise Architecture (EA), Business Process Analysis & Modeling (BPA) and Business Process Management (BPM). As an integrated product portfolio, Metastorm Enterprise™ allows organizations to maximize business results by unifying strategy, analysis and execution. Metastorm is the only solution provider to bring together these critical disciplines on a single software platform to enable an understanding of enterprise architecture and strategy, accurate impact and opportunity assessment, effective process execution, and accelerated value realization for organizations worldwide.
