Metastorm Enterprise Named a Trend-Setting Product of 2009

Metastorm Recognized as One of Industry's Best by KMWorld Magazine

BALTIMORE, MD – August 27, 2009 – Metastorm, a leading provider of Business Process Management (BPM), Business Process Analysis (BPA), and Enterprise Architecture (EA) software for aligning strategy with execution, today announced that *KMWorld Magazine* has named the Metastorm Enterprise portfolio a “Trend Setting Product of 2009.” This marks the fifth consecutive year that Metastorm has been recognized by the magazine for its ability to help customers align strategy with execution for optimal business performance throughout the enterprise.

“Metastorm continues to drive product and service innovation,” said Hugh McKellar, KMWorld Editor-in-Chief. “The judging panel recognized Metastorm for its superior ease of use and for its industry thought leadership in offering an extended portfolio of EA, BPA and BPM tools.”

KMWorld’s judging panel, which evaluated more than 800 offerings, consisted of editorial colleagues, analysts, system integrators, vendors, line-of-business managers, and users from C-level executives to entry-level knowledge workers. Metastorm was selected for clearly demonstrating identifiable technology breakthroughs that serve its full spectrum of constituencies, especially its customers, while seamlessly integrating into enterprise wide environments.

To date, in 2009 Metastorm has made several significant enhancements to its enterprise portfolio, including:

- Metastorm Integration Manager Version 8.5, which combines powerful integration-centric process management and managed file transfer (MFT) with Metastorm’s market-leading human-centric BPM suite.
- A new software product, Metastorm ProVision® Connect for SAP, which provides a

comprehensive interface between the Metastorm ProVision enterprise architecture and business process analysis suite and SAP Solution Manager.

- Metastorm Integration Manager for Linux System Z (zLinux)—expanding its integration capabilities and allowing customers to continue operating critical applications on proven enterprise-class platforms while enhancing and extending the business processes that surround them.

These and other developments illustrate Metastorm's unwavering commitment to creating innovative software and solutions that drive enterprise effectiveness and optimization.

"We have always felt that Metastorm has been a trend-setter in the industry and we are pleased that the editors of *KMWorld Magazine* continue to acknowledge us as a top product for knowledge management," stated Eileen Garry, chief marketing officer for Metastorm. "We remain committed to helping companies around the world drive their success by improving core business processes and this recognition further distinguishes our capabilities to do so."

The complete list is featured in the publication's September issue.

About Metastorm, Inc.

With a focus on enterprise visibility, resource optimization, efficiency and agility, Metastorm offers market-leading software for enterprise and business architecture (EA), business process analysis (BPA), and business process management (BPM). As an integrated product portfolio, Metastorm Enterprise allows organizations to improve business results by better aligning strategy with execution. By combining the power of these three disciplines onto a common platform, Metastorm is helping organizations worldwide focus on the right business improvements, instill stronger governance, and accelerate time to value.
