Metastorm Hosts Panel-of-Experts Webinar on Lowering the Cost of Workers Compensation Claims

BALTIMORE, MD – November 25, 2009 – Metastorm, a leading provider of Business Process Management (BPM), Business Process Analysis (BPA), and Enterprise Architecture (EA) software for aligning strategy with execution, today announced that it will be hosting an upcoming webinar that will focus on educating attendees on how to identify techniques and tools to provide new ideas that can help organizations proactively manage workers compensation insurance claims.

A recent U.S. Bureau of Labor Statistics report shows that the medical cost component of an insurance claim is on the rise. With today's escalating medical costs and ever changing legal and regulatory constraints, there is tremendous pressure for organizations to proactively manage claims. Now more than ever the use of objective functional testing can be a vital tool to combat costs and minimize risk.

This webinar will be presented by a panel of experts led by Dr. Adam Seidner, National Medical Director of Travelers Insurance. The webinar will provide insight into the results of a Travelers study using Electrodiagnostic Functional Assessment (EFA) – a diagnostic tool that accelerates diagnosis and treatment and lowers overall costs of medical claims and provide an overview of Metastorm BPM®, a process automation and management software tool that allows employers to more effectively and proactively manage their claims to improve compliance and minimize costs.

EFA Technology Assessment: Proactive Claims Management

Date: Thursday, December 3, 2009

Time: 10:30am PT/ 12:30pm CT/ 1:30pm ET
