

Metastorm Smart Business Workspace for Metastorm Knowledge Exchange

Personalized access to views of your entire enterprise

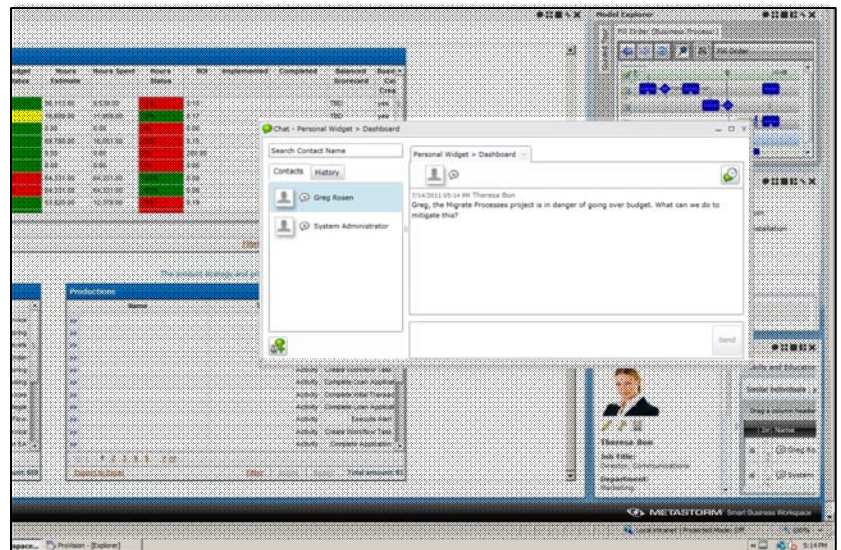

Getting the maximum return on your investment in Enterprise Architecture initiatives can be enriched by increasing access to and use of the information gathered and stored in your enterprise data repository. Whether you are communicating corporate goals and strategic initiatives or facilitating on-line collaboration between business and IT users on process improvement projects, each can be enhanced when information is delivered in an easy to navigate, highly personalized workspace. Deliver access to corporate knowledge and enterprise insight needed by IT and operational teams in a way that best meets the needs of individuals in the company with Metastorm Smart Business Workspace.

Personalize your workspace to access your organization's enterprise and business architecture insights and combine that with other applications and websites that you use in your daily work. Leverage Metastorm Smart Business Workspace to find and collaborate with others in your organization based on their user profiles and identified skills, certifications and special training. These capabilities allow you to not only perform your work more efficiently but to bring together IT and business views in order to collaborate and communicate across the enterprise from your desktop. With Metastorm Smart Business Workspace, you will:

Metastorm Smart Business Workspace provides one interactive interface enabling you to design a personal and more effective work environment.

- **Ensure continued alignment of IT and business** by having everything you need to collaborate, edit models, simulate change, and access third-party information from one workspace.
- **Communicate effectively across your enterprise** and collaborate with key stakeholders in business and IT via integrated chat features that are linked to specific models and projects.
- **Accelerate enterprise-wide collaboration** by searching user profiles to identify the resources you need to improve the design, requirements gathering or discovery process.

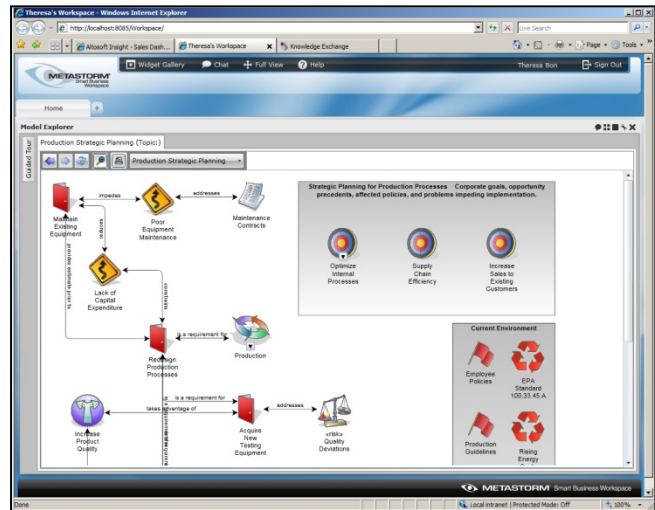

Get deeper insight into the processes, applications, and resources that make up your organization by accessing stakeholder knowledge through real-time chat.

Key Features and Benefits

Built on the latest Enterprise 2.0 technologies and our leading, adaptive framework, the Metastorm Smart Business Workspace provides:

- **A personalized workspace** that enables you to arrange the platforms, applications, websites, and collaborative environments in the way that best suits your personal working style. Metastorm Smart Business Workspace is unrestricted and easy to use so that you can quickly create a custom layout for your workspace whenever you want in order to keep close at hand the information you need to get your work done. Metastorm Smart Business Workspace delivers a series of components to get you started, giving you access to all Metastorm models, metrics, maps, and much more from across your Metastorm Business Transformation Platform. Metastorm Smart Business Workspace is as easy as pointing-and-clicking on new information sources, sites, and applications to combine these into a single view.
- **Chat contextually linked to models and processes** allows you to capture the communication exchanged in connection with a specific project to ensure that an audit trail is available for future analysis. Build and have direct access to the collective knowledge of your organization to better understand the views of IT and business and to better communicate company goals and their supporting operational details across your enterprise.
- **Connect and collaborate with the right stakeholders across business and IT** Identify those in the organization who can contribute to your projects and provide input into the design, requirements gathering or discovery process. With Metastorm Smart Business Workspace you will find the people who can help accelerate your understanding of the organization and be able to collaborate with them in order to capture the most complete view of your enterprise.

Access all of your models in Metastorm ProVision directly from Metastorm Smart Business Workspace.

Metastorm Smart Business Workspace delivers access, insight, and flexibility to accelerate your business transformation initiatives.
