

Metastorm ProVizion® Connect for SAP – Implementation Services

Optimizing SAP Environments with Process-Based Analysis

Successful SAP implementations must be based on a thorough understanding of the solution's capabilities and its impact on your business—with visibility from a business process through to requirements and ultimately into the package implementation. But building and maintaining relationships between business processes and SAP solutions can be a difficult, expensive and time-consuming endeavor.

Metastorm can help improve your modeling and process deployments in SAP environments with the combined Metastorm ProVizion® Connect for SAP solution and service offerings. The Metastorm ProVizion Connect for SAP solution provides a comprehensive interface between the Metastorm ProVizion enterprise architecture and business process analysis suite and SAP Solution Manager. It is designed to accelerate the design and deployment of solutions running on SAP and help you gain a broader picture on how your SAP processes are interlinked to other assets in the organization.

Whether you are implementing SAP for the first time, trying to understand a current implementation, or driving toward a SAP upgrade, Metastorm's Professional Services team can guide you every step of the way with our Metastorm ProVizion Connect for SAP service offering.

Our consultants enable a quick project start-up utilizing SAP best practices that save project time and money. With a process-oriented and model-based SAP analysis, we build your business blueprint. We ensure that your SAP solution meets your current and future business needs, supports cross-functional processes and reduces change management risks—providing detailed documentation and communication regarding the processes to be implemented.

The Metastorm ProVizion Connect for SAP service offering includes:

- Successfully installing the Metastorm ProVizion Connect for SAP software.
- Developing/aligning modeling standards for SAP Solution Manager.
- Performing a modeling gap analysis.
- Building a migration plan for transforming current models to the new standards.
- Updating existing models to align to new standards.

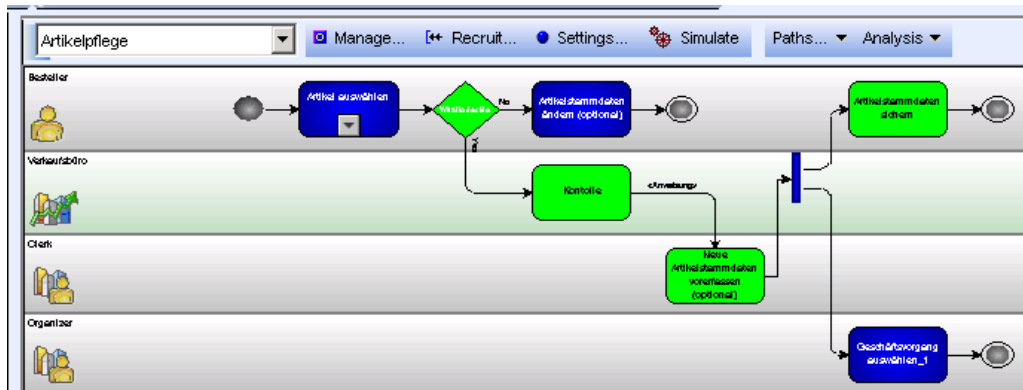

Highlights

Benefits

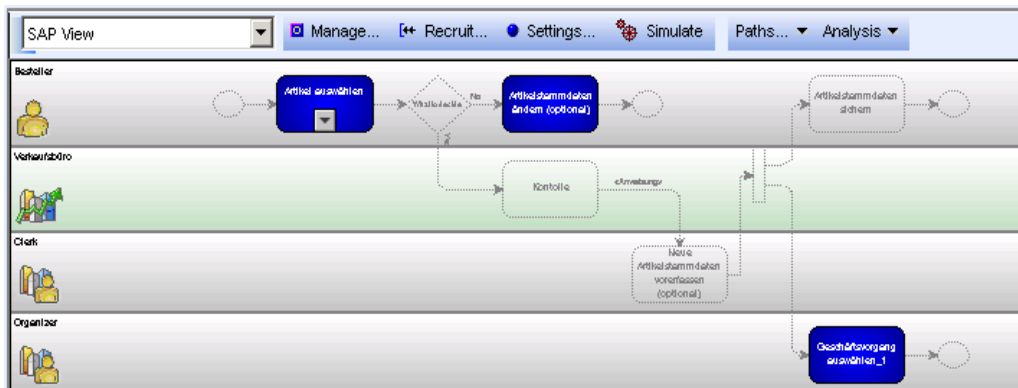

- Process-oriented and model-based SAP analysis builds your business blueprint
- Comparison and alignment of all end-to-end business processes with SAP reference processes drives gap analysis and change management
- Detailed documentation and communication of the processes to be implemented
- Quick project start up utilizing SAP best practices saves project time and money
- Model-based deliverables provide clear and effective communication between your business, IT and systems integrator
- Facilitated modeling and process review workshops drive participation, build consensus and create early buy-in—reducing resistance to change
- Enhanced process capturing for requirements definition closes the gap between business and IT
- Synchronized models with no media breaks across the requirements definition, blueprinting, implementation and testing phases

- Training modelers on best practices when integrating Metastorm ProVision and SAP Solution Manager.
- Planning and executing SAP modeling projects to optimize SAP implementations.

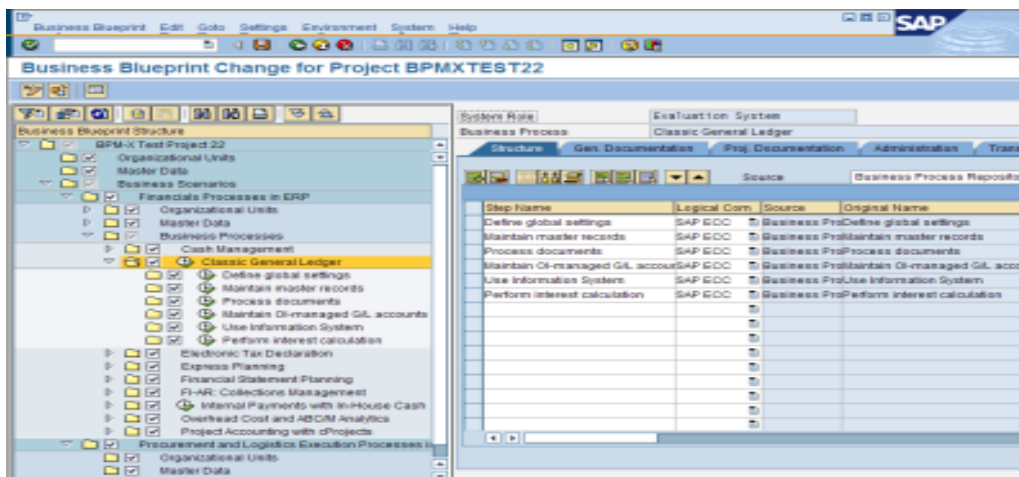

With our facilitated modeling and process review workshops, Metastorm consultants drive participation, build consensus, and create early buy-in, reducing resistance to change. In addition, the model-based deliverables provide clear and effective communication between your business, IT and systems integrator.
