

# Metastorm Integration Manager Rapid Implementation

## Accelerate Your Development

The Metastorm Integration Manager (MIM) product family enables the sharing of data and system-centric processes among diverse environments. Its capabilities offer rapid and cost-effective collaboration between combinations of modern and more obscure legacy applications, databases, and file systems regardless of computing environment.

The MIM Rapid Implementation service offering employs a “SWAT team” approach to help you install, configure, and customize a MIM/WebSphere MQ environment. Our well defined, packaged services are designed to provide you with a customized MIM footprint from which you can optimally grow your environment.

Delivered by certified Metastorm professionals with extensive real-world experience, our services provide an ideal baseline for developing “proof-of-concept” MIM or WebSphere MQ enabled applications and the disciplined environment required to provide an effective technology transfer. Ultimately you will be left with a functional environment that can serve as the foundation for deploying MIM or WebSphere MQ throughout your enterprise.

The Metastorm Rapid MIM service offering includes:

- Installing and configuring MIM and WebSphere MQ (if necessary) on two to four hardware platforms
- Executing test file transfer use-cases to validate the MIM environment
- Co-developing a simple integration using Directory Monitoring
- Using MIM best practices to make recommendations on MIM Registry configuration
- Reviewing MIM operations and support requirements and implementation strategies, processes, procedures such as security, disaster recovery, monitoring, etc.

## Highlights

### Benefits

- See and learn the correct and recommended method to install and configure MIM in your environment
- Benefit from expert consultants who understand MIM and integration strategy, technology, and operations
- Receive support from an armed development team with a solid, ready-to-use MIM implementation
- Employ a “walk before your run” methodology to facilitate understanding of the basic MIM capabilities prior to delving into more complex integrations
- Deliver some reusable business services to enable your team to build upon a solid MIM foundation
- Get your team working and using MIM best practices to facilitate successful custom integrations

- Providing a detailed report that documents the complete MIM Rapid installation (step-by-step guide)
- Discussing next steps regarding your MIM implementation and future direction

The MIM Rapid Implementation service engagement will last one to two weeks depending on the size and complexity of your environment. Metastorm provides the following deliverables upon completion of the MIM Rapid Implementation:

- Results document that includes:
  - WebSphere MQ topology diagram specific to this engagement
  - High-level design of the MIM integration
  - All MIM/MQ detailed configuration definitions, parameters, etc. for this installation
  - High-level naming conventions/guidelines for the use of WebSphere MQ
  - MIM best practices for Managed File Transfer
  - Installation and Configuration Guide (step-by-step)
- Final demonstration/presentation to your staff

## Proven Implementation Methodology

The Metastorm Rapid Delivery Framework (RDF) is a robust and adaptable approach to rapidly deploying your BPM and Integration initiatives. Developed and continuously enhanced by the industry experts of the Metastorm Professional Services team, the best practice delivery methodologies of the Metastorm RDF help you increase speed to value and establish a solid foundation for on-going process and system improvements by fully leveraging the depth of capabilities and flexibility offered in the Metastorm BPM® and Metastorm Integration Manager software solutions.

With a strong customer focus and emphasis on collaboration, the Metastorm RDF helps ensure your implementation is easily understood and embraced. The five phases of the Metastorm RDF include:

- **Engagement** – project discovery and initiation
- **Collaboration** – communication of requirements, initial prototyping
- **Definition** – detailed solution and architecture design, enhancement of prototype to convert to development model
- **Construction** – enhancement of development model to convert to complete application, project team testing

- *Transition* – customer QA and user acceptance testing, deployment activities

Throughout the entire engagement, you maintain full project visibility and participation, allowing checkpoints and milestones to be easily tracked and measured by everyone involved. The Metastorm RDF approach to implementation perfectly complements the Metastorm Enterprise™ portfolio of solutions, enables the transfer of knowledge and skills to your team, and helps you achieve a rapid and successful solution roll-out that delivers immediate results.

## Why Metastorm?

Metastorm and our integrated support network have the experience and resources necessary for successful planning, enterprise integration, customization, project management, technical support and education to help you get the most out of your Metastorm investment. We offer the right combination of the industry's top people and solutions to help you meet your business objectives. Metastorm Professional Services deliver:

- Expert consultants who understand BPM and integration strategy, technology and business process challenges in your industry
- Proficient trainers experienced in knowledge transfer
- Superior customer support for immediate response and results
- Diverse partner access to complement the Metastorm team

Metastorm is committed to your success and to building a long-lasting relationship that helps you realize a strong return from your investment – both now and into the future. Let our Professional Services team help you take full advantage of Metastorm technology by analyzing your business and system processes, identifying issues, and transforming them into efficient Metastorm processes.
