

300 Metastorm BPM® 7+Developer Certification

Important Facts:	5 hours 30 minutes
Target Audience:	Experienced Metastorm BPM Developers and Consultants that wish to have their skills officially recognized.
Class Objectives:	The Metastorm Developer Certification program sets the benchmark in Metastorm BPM Development skills and guarantees a premier standard of Metastorm BPM ability. The program offers a means for Metastorm to validate a consistent level of knowledge transfer from its training programs and to qualify that its partners and customers are attaining a high level of Metastorm BPM expertise – both of which will translate into the rapid return on investment and implementation of successful, high-value Metastorm BPM solutions that will help organizations achieve Enterprise Process Advantage®.
Prerequisites:	We recommend that candidates successfully complete our MBPM 101 Foundation training class and spend at least six months working with Metastorm BPM before they attempt the Certification exam..
Topic Outline:	<p>Developer Certification consists of two exams that test core Metastorm BPM skills and process design knowledge with an overall pass of 80%.</p> <p>Part 1: a written paper consisting of multiple choice and long-answer questions that tests core product knowledge. This paper is completed without access to the Metastorm Designer or any product documentation. This exam lasts two hours and the pass rate is 75%</p> <p>Part 2: a scenario-based practical test where candidates build a Metastorm process to an outline specification. Candidates choose from three scenarios and must build a process to a specification. This exam is marked on functionality; marks are awarded for achieving an aspect of the specification, not on the method used to do so. This exam lasts three-and-a-half hours; the pass mark is 75%</p>

Candidates must pass both sections of the exam with an overall grade of over 80% in order to become certified.

- Certification days will be run at Metastorm offices
- Results will be returned to candidates within 1 week.
- Successful candidates will be given a framed certificate and an official Certified Metastorm BPM Developer logo to place on their résumés.
- This Certification is tied to a full product version i.e. candidates certified on version 7+ are not certified on version 9.
- The cost for the certification is \$1000.00 per person.
